The Canadian Chiropractic Research Foundation (CCRF) is delighted to announce that **Dr. Jean-Sébastien Blouin DC, PhD** has been promoted to Associate Professor and granted tenure at the University of British Columbia.

Dr. Blouin holds the “CCRF/UBC Professorship in Spine Biomechanics and Human Neurophysiology” in the School of Kinesiology. He is a recipient of the prestigious MSFHR Scholar Award and Establishment Grant, as well as an NSERC Discovery Grant. His research focuses on the physiology of human movement with particular interests in the sensorimotor control of balance, the neural control of the neck musculature and the pathophysiology of whiplash injury. Dr. Blouin is a member of the research team in neuromechanical kinesiology ranked among the top four research groups in the NMK area globally.

Dr. Blouin has been a tremendously rewarding investment in chiropractic research. He has made highly significant research contributions to the chiropractic community and is clearly a world-class researcher. The University of British Columbia, one of Canada’s leading universities, holds an international reputation for excellence in advanced research and learning.
