

CHIROPRACTIC CARE IN CANADA

"...when considering effectiveness and cost together, chiropractic care for low back and neck pain is highly cost effective, (and) represents a good value in comparison to medical physician care..."

- Choudry et al. (2009)

8,400+

Over 8,400 licensed chiropractors practise in the 10 regulated provinces.

Canadian chiropractors are extensively trained in the assessment, diagnosis, management and prevention of biomechanical disorders originating from the muscular, skeletal and nervous systems.

WHAT IS CHIROPRACTIC?

The word "chiropractic" derived from Greek means **"done by hand"**, and still reflects the hands-on, non-invasive approach of modern chiropractors.

ROLE

Chiropractic care is the assessment, diagnosis, conservative management and prevention of musculoskeletal (MSK) conditions and disorders, primarily through the use of non-invasive manipulation and other manual therapies.
